

Fibrowatt Finalist for Platts 10th Annual Global Energy Awards

Fibrowatt has been selected as a finalist for Platts 10th Annual Global Energy Award in the category of Sustainable Technology Innovation of the Year. Since 1999, Platts Annual Global Energy Awards have acknowledged innovation, leadership and performance in key categories of the energy industry. The Platts Global Energy Awards have been described as the energy industry's most prestigious form of recognition.

Fibrowatt is one of four finalists selected to receive the first Sustainable Technology Innovation of the Year award. The Sustainable Technology Innovation of the Year award was created to specifically recognize a significant effort in the quest for a carbon neutral world. This award will recognize the company which, in the opinion of the judges, has made the most innovative technology advance in the area of "green" technology - whether in the design of new renewable energy generation, energy storage, advanced propulsion systems, greenhouse gas capture or containment, or energy efficiency. The Platts 10th Annual Global Energy Awards will be announced on December 3, 2008 at an awards ceremony in New York City.
